

CLAIMS

The embodiments of the invention in which an exclusive property or privilege is claimed are defined as follows:

1. A wipe dispenser comprising:
 - 5 a web, the web containing a plurality of pre-moistened wipes, each pre-moistened wipe attached to a subsequent pre-moistened wipe;
 - a container enclosing web, the container having a foramen for dispensing a wipe from the roll of pre-moistened wipes; and
 - a threader removably attached to the wipe dispenser for pulling a wipe through
 - 10 the foramen.
2. The wipe dispenser of claim 1 further comprising a hole so that the threader may be placed through the hole in order to engage the web.
3. The wipe dispenser of claim 2 further comprising a canal connecting the foramen to the hole.
- 15 4. The wipe dispenser of claim 3 where the hole is ovular.
5. The wipe dispenser of claim 4 where the threader has a first end and a second end where the first end is opposite to the second end and a snag is attached to the first end.
6. The wipe dispenser of claim 5 where the second end is comprised of a handle.
7. The wipe dispenser of claim 6 further comprising a cap, where the foramen and
- 20 the hole are contained within the cap.
8. The wipe dispenser of claim 7 where the cap has a lid.
9. The wipe dispenser of claim 8 where the lid has a snap means for securing the threader to the lid.

10. The wipe dispenser of claim 9 where the cap has a recessed interior, and the foramen and the hole are contained within the recessed interior.

11. The wipe dispenser of claim 10 where the lid is closeable over the recessed interior.

5 12. The wipe dispenser of claim 11 where the snag is a hook.

13. The wipe dispenser of claim 12 where the hook is tapered to a point.

14. A threader for dispensing a wipe from a web of wipes, the web of wipes contained within a dispensing container comprising:

a handle;

10 a first end disposed opposite the handle; and

a snag attached the first end, the snag capable of catching at least one wipe from the web of wipes.

15 15. The threader of claim 14 further comprising a neck, the first end attached to the neck, the neck and the handle attached by a hinge, the neck foldable over the handle for storage, and the neck and the handle unfolded for use.

16. The threader of claim 15 further comprising an extension arm, the extension arm capable of being slideably containable within the handle, the first end attached to the extension arm.

17. The threader of claim 14, 15, or 16 where the snag is a hook.

20 18. The threader of claim 14, where the hook is tapered.

19. The threader of claim 18 where a neck connects the handle to the first end.

20. The threader of claim 19 where the threader having a top and a bottom, where the hook is located on the bottom.

21. The threader of claim 20 where the threader is of sufficient size so that it may not be readily lost within the dispensing container.

22. A cap for a wipe dispenser, the wipe dispenser containing a web of wipes, comprising:

5 a body;

a hole within the body for engaging a wipe attached to the web of wipes; and

a foramen within the body for attaching the wipe.

23. The cap of claim 22 further comprising a lid, the lid disposed to cover the hole and the foramen.

10 24. The cap of claim 23 further comprising:

a recessed interior, the recessed interior containing the hole and the foramen, and the lid disposed to cover a substantial portion of the recessed interior.

25. The cap of claim 24 further comprising snap means for holding a threader in the lid.

15 26. The cap of claim 25 further where the snap means is comprised of a first snap and a second snap.

27. The cap of claim 26 where the cap is made of a thermoplastic material.

28. The cap of claim 27 where the recessed interior is large enough to encapsulate the threader therein.
